

GPS stations implementation project at DMN (Maroc)

- Implementation of a GNSS network : 10 stations (ASHTECH).
- Each station has a multi constellation multi signal type Choke Ring antenna.
- BERNESE software for the ZTD computation
- Stations will be referenced following IGS standard.
- Maroc-Météo has a Hymex Project partnership.
- Data exchange partnership with ANCFCC.

Location of the GPS stations

Oujda station

Maroc-Météo expectations

- Intégrate ZTD and humidity data of the other stations over the domains of DMN models
- Recomputation and comparison of the ZTD by some EGVAP analysis centers
